

Group Supervision

For Professional Counselor & MFT Associates
Facilitated by Ryan Hofrichter, LPC, SEP

Are you needing regular supervision on your path towards licensure?

I provide monthly group supervision for post-graduate associates pursuing licensure in Oregon as professional counselors or marriage and family therapists. Group supervision offers a unique opportunity to learn more about yourself as a clinician, gain exposure to a range of cases, and strengthen your clinical work through interaction with a supervisor and other supervisees.

Themes addressed in group supervision include:

- Personhood of the therapist
- Ethical and professional standards
- Examining dynamics of power, privilege, and oppression and providing culturally affirming care
- Case conceptualization and management
- Integrating experiential and somatic approaches into professional practice
- Working with client 'core material': understanding and addressing trauma and attachment woundings
- Couples counseling; interpersonal process group planning and facilitation
- Working with counter-transference, vicarious traumatization, and professional burnout

Facilitated by:

Ryan Hofrichter, LPC, SEP
